

******DISCLAIMER******

Documentation and software resources included on this compact disk are defined as the CAC Developer Kit v2.3. The information provided is in the public domain and has been packaged by the Access Card Office as a service to CAC developers and can be found in the public domain.

COMMON ACCESS CARD DEVELOPMENT KIT (CDK)

This CDK-CD contains foundational documentation for CAC-enabling your systems. The latest version of the CDK can be downloaded from the *Developer Support* link on the ACO web site at: www.dmdc.osd.mil/smartcard. Access to this web site is available to users connecting from .mil or .gov domains. If you are unable to connect and would like to request access, contact the Access Card Office at the number provided.

Before proceeding, we recommend that you read the CAC Configuration Management Plan located in the <CAC Background> directory. This document provides the process for management of the CAC platform's configuration. The CM Process is the mechanism to evaluate proposed changes and notify impacted organizations in advance of forthcoming changes. The CAC CM process focuses on Department-wide or Joint applications, and the reusability of previously developed modules for similar functional and software application requirements. The CMP also provides information and guidance to organizations wishing to introduce changes to the CAC.

If you plan to store data on the CACs Integrated Circuit Chip (ICC) or develop a new applet, please read the CAC Applet Developer Guide located in the <Applet Development> directory to understand the steps required to obtain approval and arrange for validation testing. Requests for these services are located in the <Request Forms & Instructions> directory.

An important element that will help in your efforts to CAC-enable your systems is the ActivCard CAC SDK (acbsiprov.dll). To obtain this, please complete the ActivCard CAC SDK agreement located under the <CAC Enabled Applications> directory and send to Bill Morrow at ActivCard - Comm: (510) 574-0100; FAX 574-0101; or e-mail: bmorrow@activcard.com. For up-to-date ActivCard documentation visit www.activcard.com.

If you require additional assistance, please contact the appropriate subject matter point of contact from the following list:

Test Card Requests

Mr. Craig Wilson
Access Card Office (ACO)
703-696-7420
cacsupport@osd.pentagon.mil

Bar Code Usage and Configuration Management
(CRP/ACI Submission)

Mr. Gene Rosendahl
Access Card Office (ACO)
703-696-1633 DSN: 426-1633
barcodesupport@osd.pentagon.mil
cacsupport@osd.pentagon.mil (CM Issues)

Development Questions

Ms. Winifrid Whaley
DMDC Advanced Card Liaison
703-578-5169
whaleywi@osd.pentagon.mil

ACO Web Site Access

Mr. Ron Pusz
Access Card Office (ACO)
703-696-2672
puszrw@osd.pentagon.mil

Middleware and Specialized Technical Requests

Mr. Mike Butler
Access Card Office (ACO)
703-696-7395
butlermp@osd.pentagon.mil

Applet Development & Testing

Mr. Greg McCarthy
DMDC CAC Test Lab
(831) 583-2400 x4241
